

Internode Interaction (glossary)

internode interaction

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

a system resilience principle that states that every node, or element, of a system should be capable of communicating, cooperating, and collaborating with every other node. Jackson and Ferris (2013)

Source

Jackson, Scott, and Timothy Ferris. 2013. "Resilience Principles for Engineered Systems." *Systems Engineering* 16 (2):152-164.

Discussion

In a resilience context the internode interaction principle supports the integrity attribute.
