

# Model (glossary)

---

Special:RecentChanges/Browse/:Capability-5FEngineering > Enterprise Systems Engineering Key Concepts > model

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

(1) *A physical, mathematical, or otherwise logical representation of a system, entity, phenomenon, or process.* (DoD 1998)

(2) *A representation of one or more concepts that may be realized in the physical world.* (Friedenthal, Moore, Steiner 2009)

(3) *A simplified representation of a system at some particular point in time or space intended to promote understanding of the real system.* (Bellinger 2004)

(4) *An abstraction of a system, aimed at understanding, communicating, explaining, or designing aspects of interest of that system* (Dori 2002)

(5) *A selective representation of some system whose form and content are chosen based on a specific set of concerns. The model is related to the system by an explicit or implicit mapping.* (Object Management Group 2010)
