

Temporal Architecture (glossary)

temporal architecture

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

A temporal classification of the functions of a system according to the frequency level of execution. Temporal architecture includes the definition of synchronous and asynchronous aspects of functions.
(Created for SEBoK)

Sources

This definition was developed for SEBoK.

Discussion

The definition provided here is consistent with a multiple view of a system logical architecture that should include as a minimum functional, behavioral and temporal views.
