SEBoK v. 0.5 is divided into 5 parts:

- Introduction
- Systems
- Systems Engineering and Management
- Organizing to Perform Systems Engineering
- Implementation Examples

Each of these parts is divided into knowledge areas. A knowledge area is a subject area into which systems engineering knowledge is frequently classified. There are 33 knowledge areas in the SEBoK (v. 0.5).

Each knowledge area is further divided into relevant topics. There are 110 total topics in the SEBoK (v. 0.5).

For a few specific topics, it was necessary to further divide knowledge into subtopics. There are currently only 20 subtopics in the SEBoK (v. 0.5). A complete alphabetical list of subtopics can be found below.
