(1) *A physical, mathematical, or otherwise logical representation of a system, entity, phenomenon, or process. (DoD 1998)*

(2) *A representation of one or more concepts that may be realized in the physical world. (Friedenthal, Moore, Steiner 2009)*

(3) *A simplified representation of a system at some particular point in time or space intended to promote understanding of the real system. (Bellinger 2004)*

(4) *An abstraction of a system, aimed at understanding, communicating, explaining, or designing aspects of interest of that system (Dori 2002)*

(5) *A selective representation of some system whose form and content are chosen based on a specific set of concerns. The model is related to the system by an explicit or implicit mapping. (Object Management Group 2010)*
