

Framework (glossary)

framework

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

Architectural Framework: Conventions, principles and practices for the description of architectures established within a specific domain of application and/or community of stakeholders. (ISO/IEC/IEEE 2011)

Source

ISO/IEC/IEEE. 2011. *Systems and software engineering - Architecture description*. Geneva, Switzerland: International Organization for Standardization (ISO)/International Electrotechnical Commission (IEC)/Institute of Electrical and Electronics Engineers (IEEE), ISO/IEC/IEEE 42010.

Discussion

Examples are the Generalised Enterprise Reference Architecture and Methodologies (GERAM) (ISO 15704) and the Reference Model of Open Distributed Processing (RM-ODP) (ISO/IEC 10746).
