

Lean Value Stream Mapping (glossary)

lean value stream mapping

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

Map all end-to-end linked tasks, control/decision nodes, and the interconnecting flows necessary to realize customer value. During the mapping process, eliminate all non-value added activities, minimize all necessary non-value activities, and enable the remaining activities to flow without rework, backflow, or stopping. (Oppenheim 2011)
