

Mission (glossary)

mission

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

The mission of a system is the top-level function of the system; the one that synthesizes all transformation of all inputs and solicitations into outputs and reactions. (Created for SEBoK)

Source

This definition was developed for the SEBoK.

Discussion

For a full discussion of the role and importance of a clear understanding of mission needs in systems engineering see the Business or Mission Analysis article.
