

Structure (glossary)

structure

The printable version is no longer supported and may have rendering errors. Please update your browser bookmarks and please use the default browser print function instead.

(1) *(architectural structure)* A physical or logical layout of the components of a system design and their internal and external connections. (ISO/IEC 2009, 1)

(2) *(Data structure)* a physical or logical relationship among data elements, designed to support specific data manipulation functions. (ISO/IEC 2009, 1)

(3) *(Generalization structure)* a connection between a superclass and one of its more specific, immediate subclasses. (IEEE 1320.2-1998)

(4) *The static existence of the system; namely its elements and their relationships.* (Created for SEBoK)
